

## Course Overview

This course provides knowledge essential to the servicing of vehicle air conditioning systems, and also covers the required underpinning knowledge and practical skills for technicians intending to undertake the assessment for refrigerant handling certification. EU legislation requires all technicians involved in the servicing, recharging and repairs to vehicle air conditioning in passenger cars and light vans to be certified to carry out this work.

## Who is the course for?

Vehicle technicians who ideally have some prior knowledge of the operation of automotive air conditioning systems and the typical service equipment used.

## What will I get out of it?

You will be able to:

- Identify all the main components of an automotive air conditioning system and state their function.
- Complete a typical automotive air conditioning service.
- Demonstrate safe working practices.
- Understand air conditioning service health and safety procedures

**Course Duration**

30Hours (5 days)

**Course Format**

Labs /workshop

**Course Fees**

240 Omani Rial

**Language**

Arabic/English
